NOTES: Available in standard and weathered finishes. Full cubes only.
Design Options Using VERSA-LOK® Accent® & Cobble® Units

Attractive, durable retaining walls can be constructed using only VERSA-LOK Cobble or VERSA-LOK Accent units. These units offer the same features and benefits as VERSA-LOK Mosaic walls, including:

- Classic split-face texture
- Setback or near-vertical walls
- No mortar or concrete footings required
- Great options for tighter radius projects, such as planting areas and tree rings

Maximum height for an unreinforced VERSA-LOK Accent or VERSA-LOK Cobble wall using a ¾” inch setback is four feet. Maximum height for an unreinforced wall built with a near-vertical setback is three feet. Individual site, soil, and loading conditions (including terraces) may limit unreinforced wall heights to less than those stated. Taller walls require soil reinforcement and engineering assistance. Please contact your local VERSA-LOK representative if unsure about any site, soil, height, or local construction requirements.
